**FOR IMMEDIATE RELEASE**

## **STACK TO LAUNCH NEW RANGE OF “BEST SPECIFICATIONS, BEST VALUE” PRODUCTS AT PRI 2007**

Orlando, FL., 6 December 2007 - Stack are unveiling “BEST SPECIFICATIONS, BEST VALUE” new products that offer racers at all levels the very best in technology at new low price levels.

The new range of data acquisition systems and instruments continues Stack’s commitment to bring the company’s proven technology to all sectors of Motorsport - offering exceptional performance at an accessible price but without compromising on Stack’s reputation for quality.

Chief among new product offerings will be Stack’s **MULTI-FUNCTION DATA ACQUISITION SYSTEMS**. The feature-rich systems offer unrivalled specifications:

- Faster data recorder - up to 200Hz per channel
- Bigger recording memory - 32MB as standard
- Better resolution - 10 bit analogue/16 bit digital inputs
- More sensor inputs - Up to 45, 14 built-in
- Built-in 3-axis +/-6g g-sensor

The single box system incorporates the hardware capabilities for powerful upgrade already built-in awaiting simple, fast activation by PIN code:

- Built-in CAN ECU link and GPS interface options
- Built-in real-time telemetry option
- Synchronized video-logging and video-data overlay option

Also launching at PRI this year, Stack are presenting a range of **POWERFUL AUXILIARY GAUGES** at a price to suit every pocket

The full range of 52mm (2 <sup>1</sup>/<sub>16</sub> inch) gauges is available in three types: *Stepper Motor Analogue*, *Electric Analogue* and *Mechanical Analogue*. A Wide-band Air-Fuel (Lambda) Gauge is also available. Key features:

- 52mm diameter
- Fast, smooth stepper motor needle drive
- 270° full sweep movement for excellent readability
- Remotely mounted solid-state sensors, keeping hazardous fluids in the engine compartment
- Better than 2% accuracy
- All-electronic design for maximum reliability
- White LED through-the-dial backlighting
- White LED illuminated needle

The comprehensive range include Oil Pressure, Fuel Pressure, Water Temperature, Oil Temperature, Boost Pressure, Exhaust Gas Temperature, Fuel Level and Battery Voltage. Gauges are available in PSI or BAR scales across the three types.

Stack's full product range includes tachometers, integrated display systems for performance road cars and a choice of stand-alone and integrated data acquisition systems. Stack Inc. is the number one supplier from trackday enthusiasts to professional teams.

**Stack is exhibiting at the Performance Racing Industry (PRI) Show in Orlando, USA, 6 - 8 December 2007, Peninsula No. 601**
