Fax: (01869) 245500

Orlando, CA, 12 December 2006 - Stack a leading global supplier of Instrumentation, Data Acquisition Systems and Video-Logging solutions to all levels and disciplines of Motorsport and manufacturers of performance road cars are seeking new tech agents and dealers to promote a new ultra-competitive product range. Candidates can call at the company's booth at the Performance Racing Industry Trade Show taking place in Orlando, FL Thursday, December 14 - Saturday, December 16, 2006.

The company are unveiling ground-breaking new products for 2007 based on its ground-breaking new data acquisition platform, which offers exceptional performance at an entry-level price but without compromising on Stack's reputation for quality. New dealers and tech agents need to be recruited to take Stack's products to a new, larger market.

Angus Rock, Stack's Commercial Manager, said: *"Stack's innovation will bring quality data acquisition to a new market with uniquely powerful products that means novices no longer have to choose between quality and price - a step on the ladder for those seeking to start their careers in Motorsport with the best."*

Customers will get Stack's superior build-quality with high-end professional level software that is powerful but easy to use. Stack's enhanced range will be competing eye-to-eye with competitors offering comparable pricing but with inferior specifications.

Products are being launched at PRI this year include:

1. Entry-level Dash-Loggers

Most competitively priced Stack Data-loggers ever! Unbeatable combination of value for money, reliability and ease-of-use with powerful yet simple professional data analysis software included as standard

Directors: A. G. Rock, T. E. Tapping
Reg. Office: Unit 6, Southill, Combury Park,
Charlbury, Oxfordshire. OX7 3EW
Registered in England No: 1613490.
VAT Registration No: GB 348 9339 10.

2. Enhanced Pro-level Data Logging Systems

Flexible combination of up to 128 analogue, digital and ECU data channels with increased memory sizes from 1 MB to 64 MB. Cutting-edge technology allows reduced module count utilising high-density modules with up to 42 inputs

3. Wi-Fi Wireless Data-logger

Wireless WiFi connection between Data-logger and PC up to 150 feet away with automatic data download as car approaches pits. Simple, fast installation and configuration - easy to upgrade existing systems.

For more than two decades Stack's philosophy has been to lead the way in the innovative use of new technologies and provide our customers with advanced, quality engineered products at all levels of Motorsport.

Stack's product range includes tachometers, integrated display systems for performance road cars and a choice of stand-alone and integrated data acquisition systems. Stack is the number one supplier from trackday enthusiasts to professional teams.

Stack is exhibiting at the 2006 Performance Racing Industry Trade Show at Booth: #601 #603 #800 #802
